

## Fluids and Space Engineering Seminar

Date: Wednesday, December 4, 2019 at 13:00

Location: ZARM, Room 1730

### *The "Flugtechnische Vereinigung Henrich Focke e.V.", the association's work and student training*

**Christian Eigenbrod**

University of Bremen, Center of Applied Space Technology and Microgravity (ZARM)

The Aeronautical Association Henrich Focke at the University of Bremen e.V. (FVHF e.V.) is an academic aviation association of the Dept. of Engineering of the University of Bremen, which pursues the goal of enabling students of aerospace to have hands on a flying device. According to the statutes of the non-profit association, it serves the science, research and promotion of active aviation through:

- the new development, advancement, production and operation of aircrafts and aeronautical devices,
- supporting members in the practice of aviation and in the acquisition of flight licenses,
- the training and further education of the members.

The lecture presents the association's work and shows exemplary results of completed student research and development work as well as some current projects.
